

Family Learning Numeracy Workshops

P1-3- Concrete, Pictorial, Abstract approach + - x ÷ skills

P4-5- exploding dots + and x

P6-7- rich tasks and problem solving

-
- Here are some examples of the activities that we did during the Family Learning Session. Feel free to try some of these.
 - A huge thank you to all of the people who attended this event and those who gave us feedback.

Primary 1-3 Session

- Tuff trays

ADDITION STRATEGY
Count On

Count on from the larger addend.

$$16 + 3$$

2016 © All Sorts of Math

Addition

ADDITION STRATEGY
Make Friendly Numbers

Make a friendly number by decomposing another addend.

$$18 + 6$$

$$18 + 2 = 20$$

$$20 + 4 = 24$$

2016 © All Sorts of Math

ADDITION STRATEGY
Place Value

Decompose and add by the place value.

$$21 + 14$$

$$20 + 10 = 30$$

$$1 + 4 = 5$$

$$30 + 5 = 35$$

2016 © All Sorts of Math

ADDITION STRATEGY
Add Up in Chunks

Keeping one addend whole, add the second addend in friendly chunks.

$$23 + 12$$

2016 © All Sorts of Math

Our addition strategies and tools

I used Numicons.

I used a rekenrek.

I used counters.

I used fingers.

I drew objects to represent numbers.

I used a number line.

11, 12, 13, 14...

25, 24, 23, 22

I counted on/back in my head.

I used an empty number line.

Addition Activities

Activity 1- Put out some red counters then use the covers to cover them over.
Put out some yellow counters. How many are there altogether?

Challenge- make this activity harder by covering both groups of counters. How many are there?

Subtraction

Partitioning or splitting up a number

1st 2nd

SUBTRACTION STRATEGY

Removal

Start with the **minuend**, remove the **subtrahend** in friendly chunks.

$$22 - 8 = 14$$

2016 © All Sorts of Math

SPLIT STRATEGY

The split strategy is when you split a number into parts and add each part separately. This is useful for large numbers.

$$52 + 47 = 99$$

$$52 + 47 \begin{cases} 40 \\ 7 \end{cases} \rightarrow 52 + 40 = 92 \rightarrow 92 + 7 = 99$$

Our subtraction strategies and tools

I used Numicons.

I used counters.

I used fingers.

I used an empty number line.

I drew objects to represent numbers.

I used a number line.

11, 12, 13, 14...

25, 24, 23, 22

I counted on/back in my head.

Subtraction Activities

Activity 1- Put out some counters. Splat! Place a splat over the top of some. How many are left? How many are under the splat? Try to write the sum.

Multiplication

Multiplication Strategies

Array

Rows and columns with an equal amount in each.

$$3 \times 5 = 15$$

Repeated addition

$$5 + 5 + 5 = 15$$

Skip counting

$$1 \text{ hop of } 5 = 5$$

$$2 \text{ hops of } 5 = 10$$

$$3 \text{ hops of } 5 = 15$$

Our multiplication strategies and tools

I used fact families.

$$4 \times 3 = 12$$

**I used skip counting
on a number line.**

**I drew groups of items
and used repeated
addition.**

2's- 2,4,6,8,10 ..

5's- 5,10,15...

3's - 3,6,9,12...

10's - 10, 20, 30 ...

I used skip counting

Multiplication Activities

Activity 1- Practise skip counting

2,4,6,8..... 5, 10, 15,20..... 10,20,30,40.....

Activity 3- Multiplication Thinkboards. Think of different ways to represent your multiplication

Activity 4- Write a multiplication sum then draw an array to represent the sum.

$\begin{array}{cccc} \times & \times & \times & \times \\ \times & \times & \times & \times \\ \times & \times & \times & \times \end{array}$ 3 rows by
4 in each
row
 $3 \times 4 = 12$

Thinkboards

Groups

Opposite

3×4

Array

Addition

$3 + 3 + 3 = 12$

$4 \times 3 = 12$

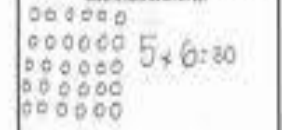

Write a multiplication word problem to match your card.

There are five lions they all have five cubs each.

Choose one of the empty place cards and invent it here as an array.

$5 \times 6 = 30$

Write a division word problem to match your card.

There are 30 lilies and they need to be spread evenly into 5 bags.

$30 \div 6 = 5$

$30 \div 5 = 6$

$5 \times 6 = 30$

$6 \times 5 = 30$

Commutative Property 2×3	Repeated Addition $2 + 2 + 2$
Equal Groups 	An Array 

Division

Share equally to divide

Skip counting

$$1 \text{ hop of } 5 = 5$$

$$2 \text{ hops of } 5 = 10$$

$$3 \text{ hops of } 5 = 15$$

Our division strategies and tools

I used fact families.

I drew groups of items and used repeated addition.

$$4 \times 3 = 12$$

I used skip counting on a number line.

- 2's- 2,4,6,8,10 ..
- 5's- 5,10,15...
- 3's - 3,6,9,12...
- 10's - 10, 20, 30 ...

I used skip counting

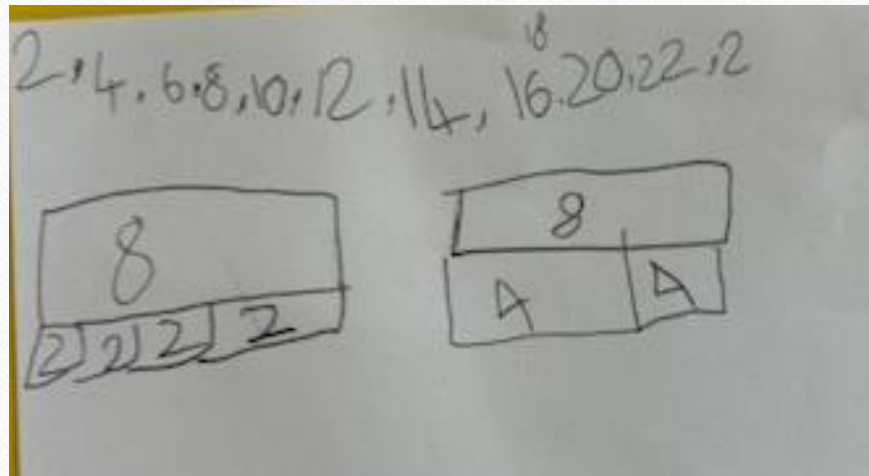

I shared objects into equal groups.

Division Activities

Activity 1- Put out some cakes then try to share them equally between the plates. Try to write the division sum to match.

Exploding Dots - Addition

What is the code for 13 using a 1+2 machine?

1: 1 4: 100
2: 10 5: 101
3: 11 6: 110

1-5

--	--	--	--	--

What is the 1-5 machine code for 13?

1-10

--	--	--	--	--

What is the 1-10 machine code for 13?

5 | 13 | 15

$$\begin{array}{r}
 358 \\
 + 287 \\
 \hline
 513 \cancel{5} \\
 5 \cancel{1} 4 5 \\
 645
 \end{array}$$

P4-5

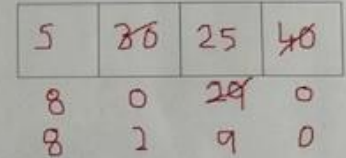

Exploding Dots - Multiplication

$2784 \times 2 =$

$1658 \times 5 =$

$$\begin{array}{r}
 178 \\
 \times 4 \\
 \hline
 428 \cancel{3} \\
 4 \cancel{2} 2 \\
 712
 \end{array}$$

$$\begin{array}{r}
 3694 \\
 \times 6 \\
 \hline
 1836 \cancel{5} 4 \cancel{2} 4 \\
 216 \cancel{5} 6 4 \\
 22164
 \end{array}$$

Pictures of family learning

P6-7 Activities

Prime Climb - Task 1
Name: _____

Discuss:
What do you see?
What do you wonder?

see	wonder
-----	--------

Name: _____

Prime Climb
Complete the Prime Chart by continuing the colour coding.

Sealed Solutions

Here is a set of ten cards, each showing one of the digits from 0 to 9:

The ten cards are divided up between five envelopes so that there are two cards in each envelope. The sum of the two numbers inside it is written on each envelope:

Using all ten number cards (only once) what numbers could be inside each envelope?

P6-7 Activities

Fifteen Cards

I have fifteen cards numbered 1-15.

I put down seven of them on the table in a row.

The numbers on the first two cards add to 15.
The numbers on the second and third cards add to 20.
The numbers on the third and fourth cards add to 23.
The numbers on the fourth and fifth cards add to 16.
The numbers on the fifth and sixth cards add to 18.
The numbers on the sixth and seventh cards add to 21.

What are my cards?

Can you find any other solutions?

How do you know you've found *all* the different solutions?

Number Palindromes

What do you notice?

Hannah bib deified
dad
level radar civic
madam Anna repaper
rotavator noon

Numbers can be palindromes too

88 313
110011 292
464 7997

THINK FAIR SHARE

To work out how many steps it takes to find out if a number is a palindrome read the information below carefully.

Take the number 24.

Reverse it 42

Add the two numbers together.

It comes to 66.

A 1-step palindrome

1-step palindrome

$$24 + 42 = 66$$

Take the number 37.

Reverse it - 73

Add the two numbers together - 110

Reverse it again - 011.

Add the two numbers together

It comes to 121.

A 2-step palindrome.

It was added twice before it was a palindrome.

2-step palindrome

$$37 + 73 = 110$$

$$110 + 011 = 121$$

Name: _____

Number Palindromes

colour palindromes red

colour 1-step palindromes blue

colour 2-step palindromes green

colour 3-step palindromes yellow

colour 4-step palindromes purple

colour 5-step palindromes pink

colour 6-step palindromes orange

Is that everything?

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Pictures of family learning

Feedback

I like to see all of the tools and strategies the children have available to them. It helps when working on maths at home.

Thank you for arranging this event, it's great to be able to come in to school and share some of my child's learning

I enjoyed the challenge of the tasks and seeing my daughters delight in teaching me how to do something she knows.

Was good to have exploding dots explained as not something iv used

Spending time with my child being shown their learning and them teaching me

Learning new techniques in numeracy being taught by my child which will in turn help when they need support with their homework etc
