

P4a - Term 2 Newsletter

News from inside our classroom

P4a have just finished a block of ocarina lessons with Mrs England where we learned how to play all the notes and started playing some tunes. We completed our writing about procedures and in Maths we focussed on place value and addition and subtraction.

Our Highlights - Looking back at Term 1

During term 1 we have been learning about Extreme Earth. We looked at natural disasters like volcanos, earthquakes, tsunamis and tornados. We took part in an earthquake warning where Mr Wood set off a siren and we had to calmly get under our desks and cover our heads until we were told we could come out.

Looking forward to Term 2

In term 2 we shall be learning about the difference between renewable and non-renewable energy sources. We shall be looking at 2D and 3D shapes in maths along with multiplication and division. Towards the end of the term we shall be covering a block of work about Christmas
